online React native training online course covers essential concepts like core react-native components, react-native APIs, authentication with Firebase, styling, deployment, processing authentication credentials, and more through case studies, hands-on approaches, and real-time live examples.

The candidate will also know how to create authentication for mobile applications, how to develop applications for both Android and iOS apps, create smaller and reusable components from robust components, and how to create innovative and new mobile react native applications efficiently. Besant Technologies has tie-up with more than 400 reputed IT corporations and MNC companies like Wipro, TechMahindra, IBM, TCS, CTS, Dell, HCl, and more that helps the candidates to be placed in top companies across the globe.

We have a crew of smart and experienced experts who provide grooming sessions on personality development, how to control and handle nervousness, how to interact and present in front of interviewers, how to represent your point of view efficiently, how to speak English, and more without much hassle. The Professionals will arrange for interviews and prepare them for F2F interaction once the candidate completes 90% of the course successfully. Apart from this, mock interviews, resume preparation guidance, HR interview preparations, corporate study materials with real-time assignments and projects also are some critical parts of the React native online training course.

Module 1: React Native – Overview

❖ React Native Features

❖ React Native Advantages

❖ React Native Limitations

Module 2: React Native – Environment Setup

❖ Install nodejs and NPM

Module 3: React Native – App

❖ How to import modules

❖ Using View

❖ Using Text

❖ Apply styles

❖ Using Flex

Module 4: Difference between State and Props

❖ Using State

❖ Using Props

Module 5: React Native – Props

❖ How to import external js

❖ How to Update value

Module 6: React Native – Styling

❖ How to add styles in inline

❖ How to import StyleSheet

Module 7: **React Native – Flexbox**

❖ flexDirection (Column, row)

❖ justifyContent (center, flext-start, flext-end,space-around, space-between)

❖ alignItems (center, flex-start, flex-end, stretched)

Module 8: **React Native – ListView**

❖ how to create a list

❖ using map() method

❖ display alert box

Module 9: **React Native – Text Input**

❖ how to create Textbox

❖ explain this keyword

❖ placeholder

❖ auto capitalize

❖ onChangeText

❖ onPress display alert

Module 10: **React Native – ScrollView**

❖ Scrollview will render a list

❖ Using ScrollView tag

Module 11: **React Native – Images**

❖ show images on the home screen

❖ Add image in local storage

❖ Add image in URI

❖ Screen Density

Module 12: **React Native – HTTP**

❖ Get request to the server return JSON data

❖ Using Fetch

Module 13: **React Native – Buttons**

❖ How to use Touchable Opacity

❖ How to use Touchable Highlight

❖ How to use Touchable Native Feedback

❖ How to use Touchable Without Feedback

Module 14: **React Native – Animations**

❖ How to use Expand element

❖ How to use collapse element

Module 15: **React Native – Debugging**

❖ Using IOS simulator command

❖ Using Android Simulator command

Module 16: **React Native – Router**

❖ navigation in React Native

❖ How to use external js file in routing

❖ Router Flux

Module 17: **React Native – Running IOS**

❖ test your app in the IOS simulator

❖ specify the device we want to use

Module 18: **React Native – Running Android**

❖ We can run the React Native app on Android platform

Module 19: **React Native – View**

Module 20: **React Native – WebView**

❖ How to use render web page to your mobile

Module 21: **React Native – Modal**

Module 22: **React Native – Activity Indicator**

Module 23: **React Native – Picker**

Module 24: **React Native – Status Bar**

Module 25: **React Native – Switch**

Module 26: **React Native – Text**

Module 27: **React Native – Alert**

Module 28: **React Native – Geolocation**

Module 29: **React Native – AsyncStorage**
